## ENVIRONMENTAL POLICY

The Management of **Hotel Dream Gran Tacande** aware of the limitation of certain natural resources, and the environmental impacts that the hotel activity generates in the environment, considers the need to be proactive in order to protect the environment. For this reason considers very important to implement an Environmental Management System to check regularly the processes, products and services developed for the activities of the **Hotel Dream Gran Tacande** and which may affect environment.

These guidelines are divided into 6 principles of action:

1. **IDENTIFY** the processes, products and services, in order to evaluate their impact on the environment.
2. **ADOPT** measures to manage and reduce the use of nonrenewable resources, the waste generation and management, emissions and discharges.
3. **ESTABLISH** policy, objectives and environmental targets, and define actions in order to improve day by day the environmental behaviour of our activity
4. **COMPLY** with the environmental laws and regulations and with the rest of the environmental commitments.
5. **ENCOURAGE** environmental responsibility among staff, suppliers, subcontractors and customers.
6. **SPREAD** among society our values and the information which shows our commitment to improving the environmental protection.
